

HW 3: Tableau

Download the following two CSV files:

1. <https://www.kaggle.com/tanuprabhu/population-by-country-2020>
2. <https://www.kaggle.com/andradaolteanu/country-mapping-iso-continent-region>

Upload the files to tableau Merge the two files on the Data Source page (of Tableau). If the merge does not happen automatically, find-out a shared field that can match in both files.

Using the merged Data Source,

- a. Create a Tableau diagram indicating the population by region. Show the country population in each bar of a region (see the figure below)
- b. Show a heating map of country population (see figure below)

Submission:

- You may submit a pdf for the two sheets
- A screen shot showing Tableau Data of how you created the sheets
